

ARTIFICIAL INTELLIGENCE

SHAPING OUR WORLD

help me create a presentation: Imagine your team is tasked with delivering a presentation on a topic shaping our world: Artificial Intelligence (AI). Your mission? Craft a 7-10-minute presentation exploring AI's impact on society.

Of course! Let's make it smooth and impressive.

Here's a strong **presentation outline** for a **7–10 minute talk** on **AI's impact on society**, plus some wording you can actually say while presenting.

Title Slide:

Artificial Intelligence: Shaping Our World

Slide 1: Introduction

Opening Hook:

"Imagine a world where machines can diagnose diseases, write music, drive cars, and even predict future trends — that world is today."

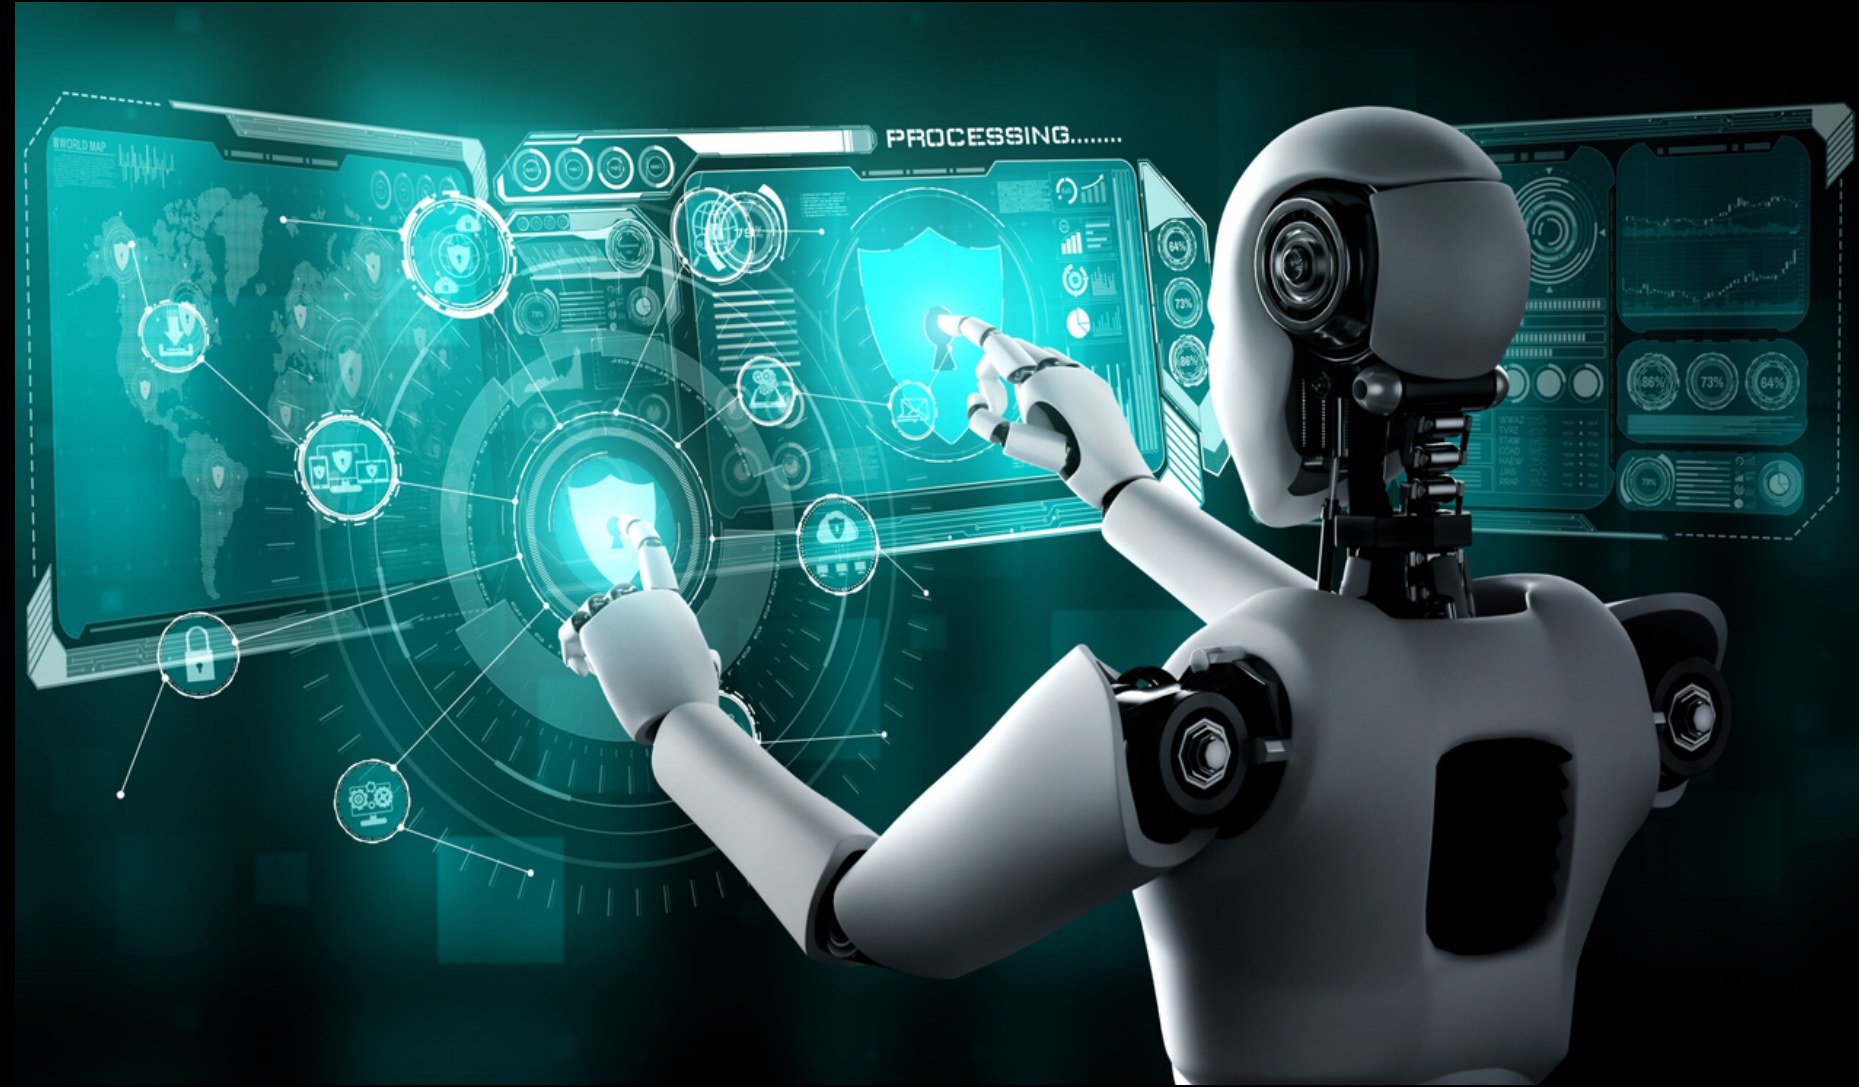

Overview:

- What is AI?
- Why is it important?
- Quick preview: Today, we'll explore AI's positive impacts, challenges, and what the future might look like.

ChatGPT

Impacts of AI on the Job Market

Benefits

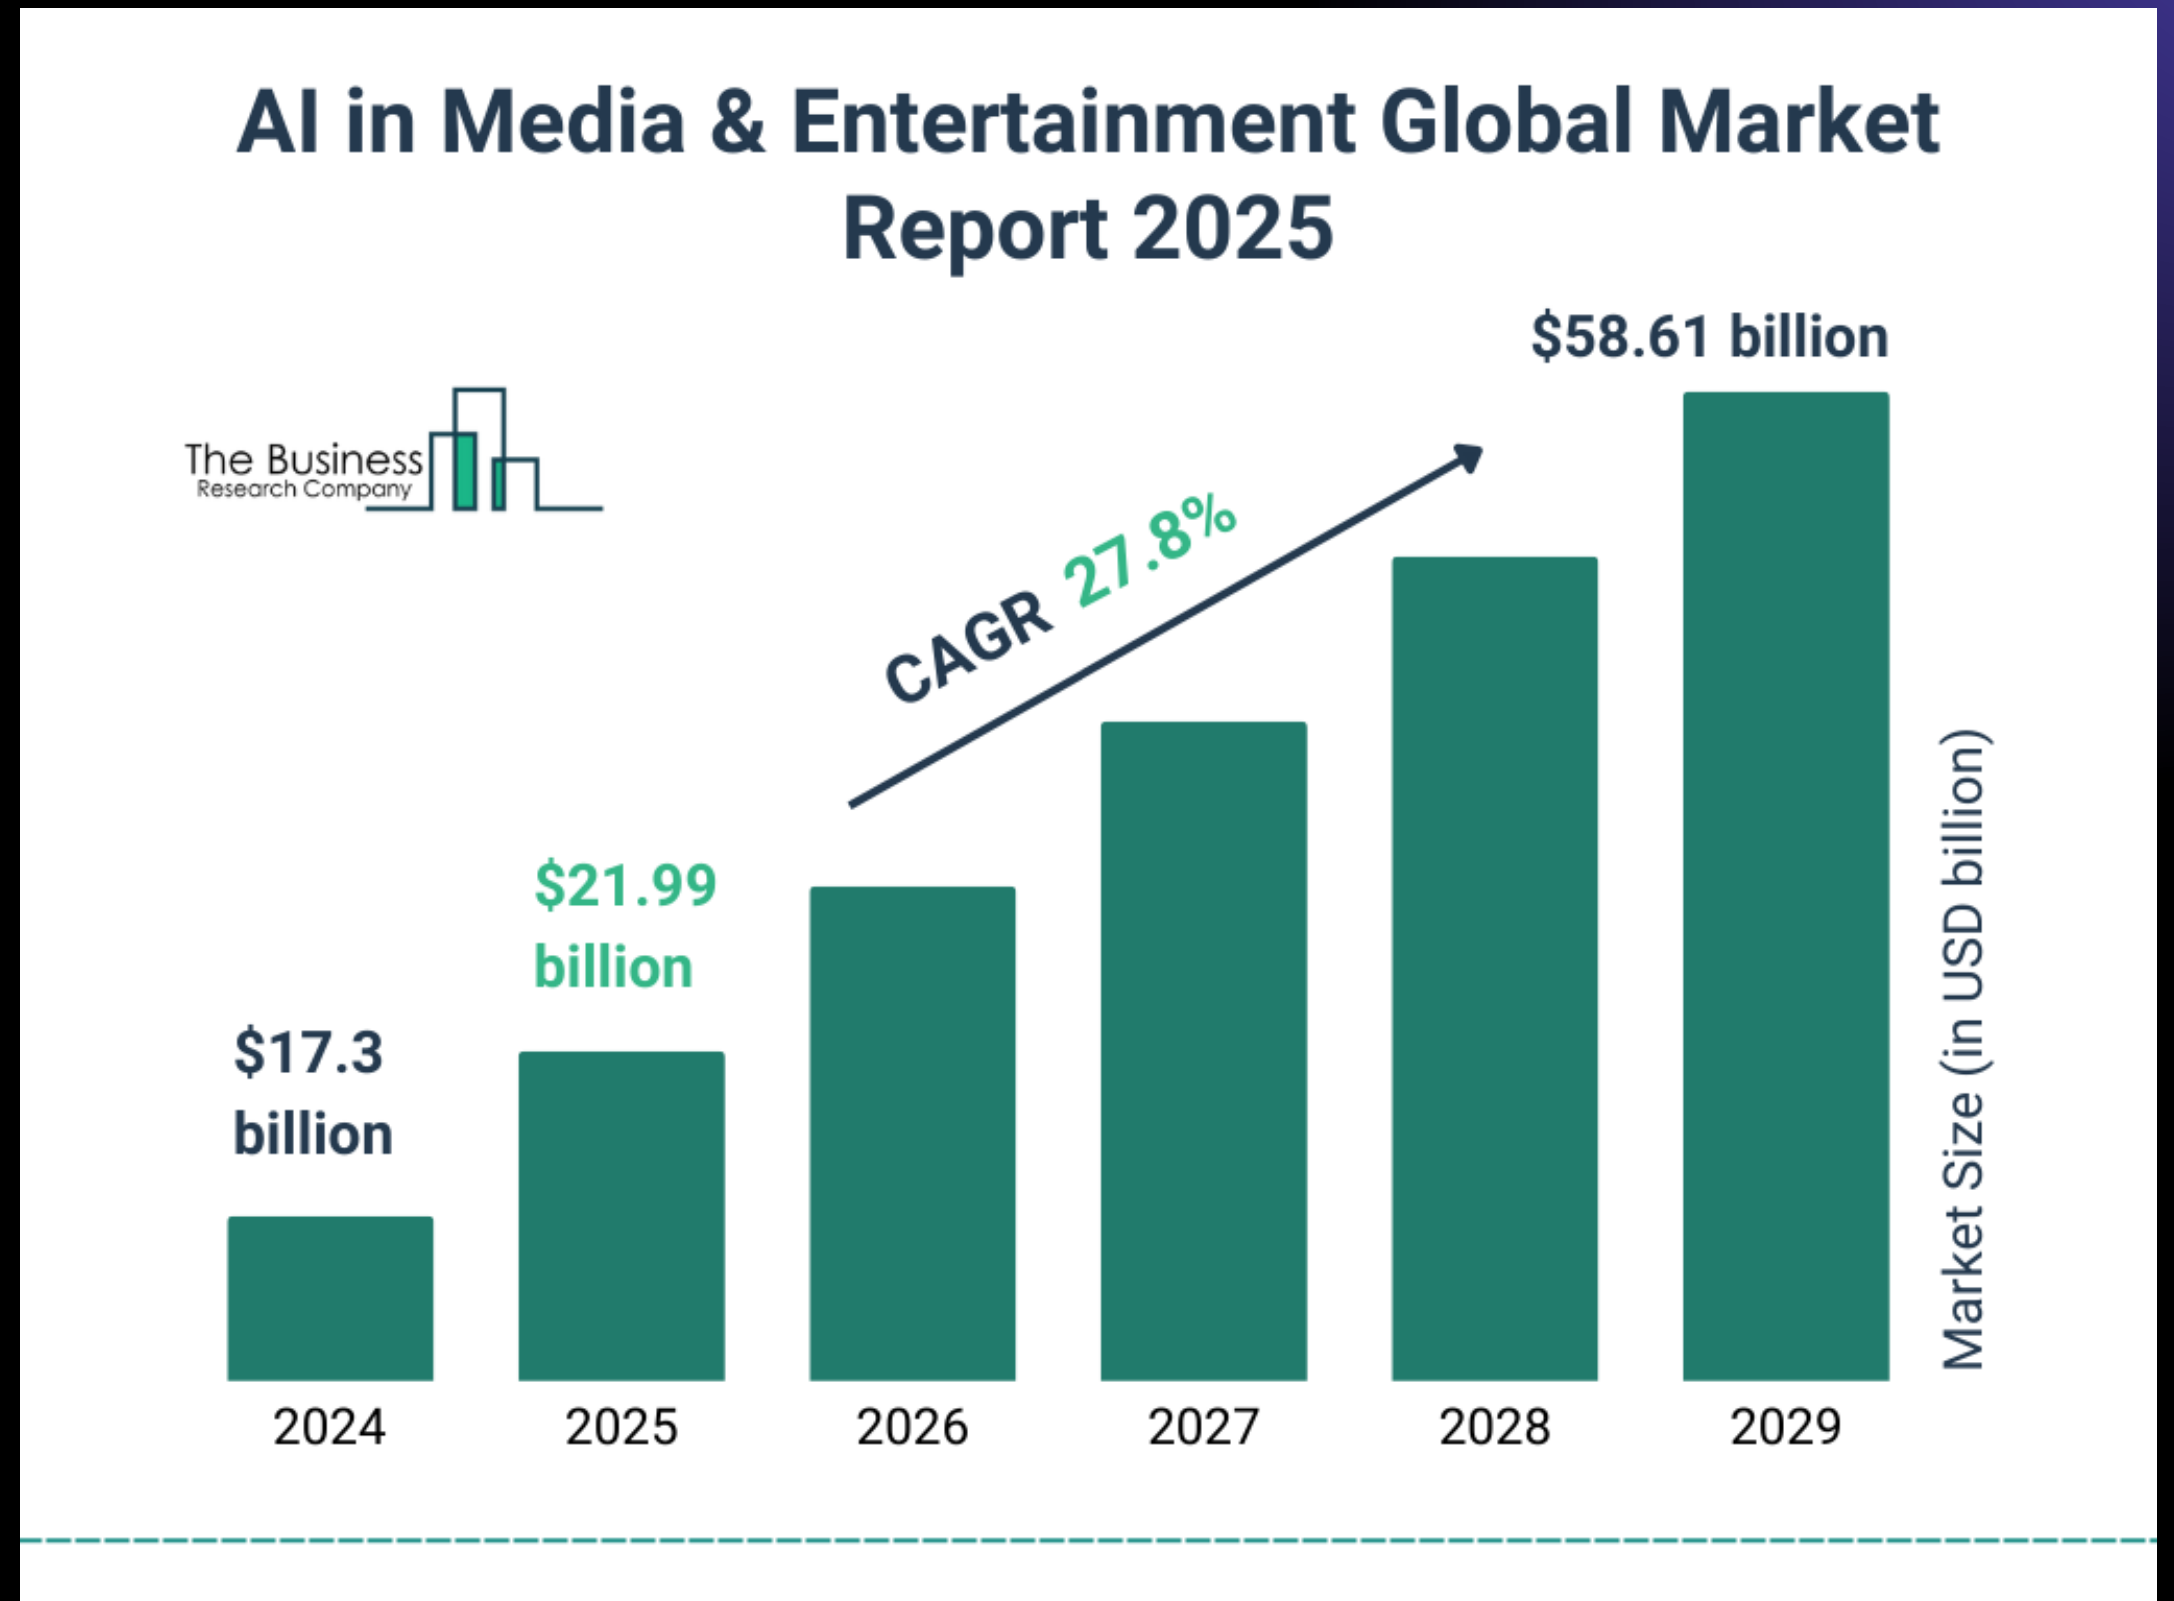

- Creates new jobs in the field of AI
- Enhances the existing jobs by improving accuracy and precision

Drawbacks

- Displaces jobs in certain areas
- Dependence on AI

Entertainment Industry

Rising trend in AI

Roles of AI on the entertainment industry

Animation

Assists animators in character animation, motion tracking, and rendering

Script Writing and Storytelling

Generate scripts, dialogues, and storylines

Video Editing and Post-Production Tools

Automatic video editing

Ethical?

Originality

Ethics is about honesty, respect and responsibility. Being original is reflecting your effort instead of someone else.

AI relies on training data differs from true creativity that requires a human "soul": consciousness, intentionality, emotional depth — all missing in AI.

Example

- A human artist inspired by Starry Night creates a new, meaningful piece.
- AI, like a photocopier, rearranges swirls without understanding or emotion.

Ethical Consideration of AI

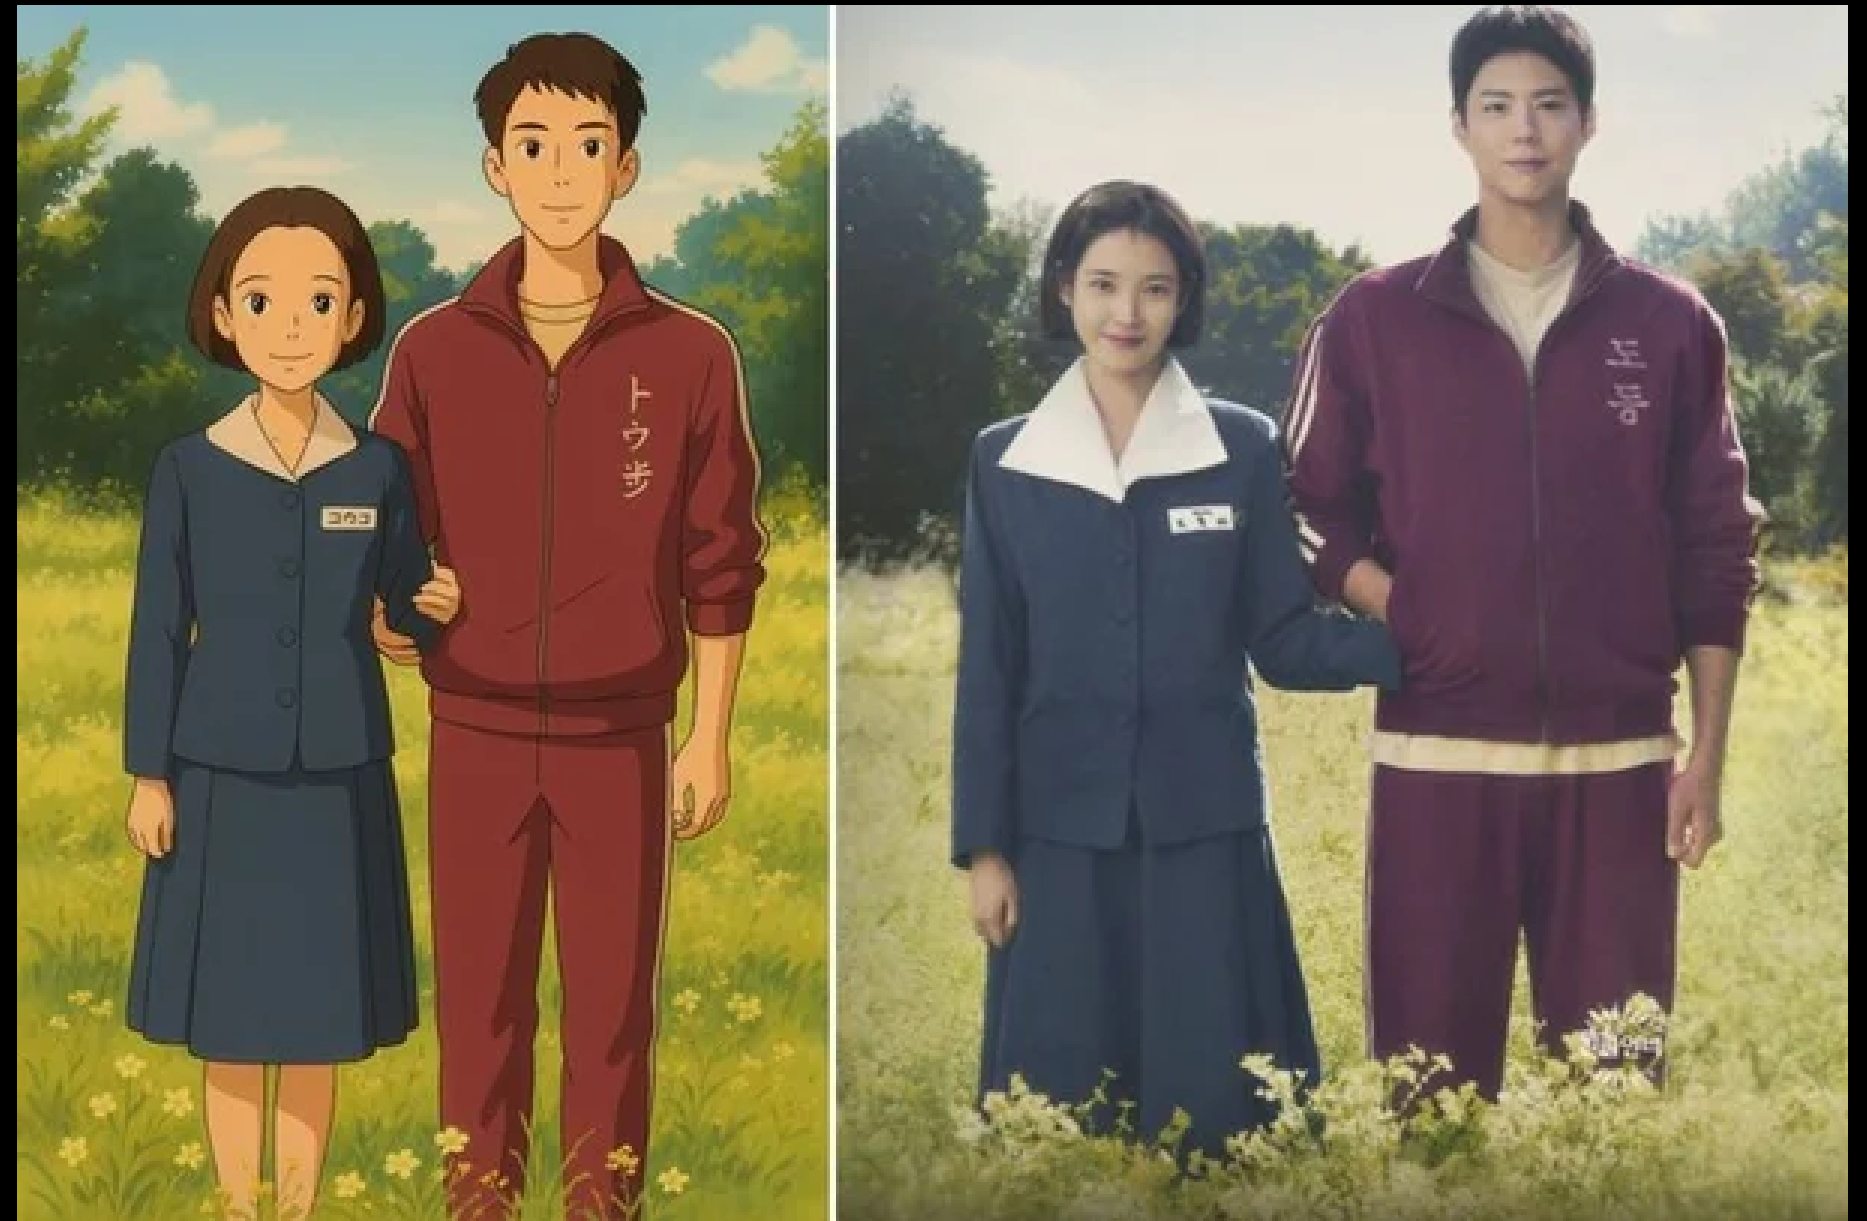

“It's not just a matter of transparency; it's a matter of the impact it has on an artist's career.”

01 Unauthorized Use of Artwork

- AI companies use artists' work without consent to train models and imitate their styles.

02 Violation of Artists' Rights

- Using art without permission undermines both ownership and intellectual property rights.

“Ghiblification” trend mimicking Studio Ghibli’s animation style

Sensitive Data

- Artists' distinctive styles may be considered sensitive data
- GDPR grants rights like access, rectification, erasure, and objection
- AI training without consent could violate GDPR principles

- *The right to be informed*
- *The right of access*
- *The right to rectification*
- *The right to erasure*
- *The right to restrict processing*
- *The right to data portability*
- *The right to object*

Societal Changes

The society's attitude towards AI is consistently shifting, and people are increasingly accepting AI art.

As a creator

The definition of art is evolving

Is art uniquely human?

- Emotional, intentional

- Fast, command-based

What qualifies art?

- impact > creator ?

Jason Allen's A.I.-generated work, "Théâtre D'opéra Spatial," took first place in the digital category at the Colorado State Fair.

Societal Changes

The society's attitude towards AI is consistently shifting, and people are increasingly accepting AI art.

As a consumer

Behavior

We expect more, faster, quick, free, yet high variety

- 🕒 shortened attention spans
- 🕒 less conscious consumption

Value

Who made this → Is it entertaining

- process + artist doesn't matter

⚠️ undervaluing human art

Evaluation

“Growing up riding in a car for every step you took, would you even remember how to walk?”

Lack of control over AI = loss of creativity = loss of the next generation

THANK YOU
