

How to use Google Play

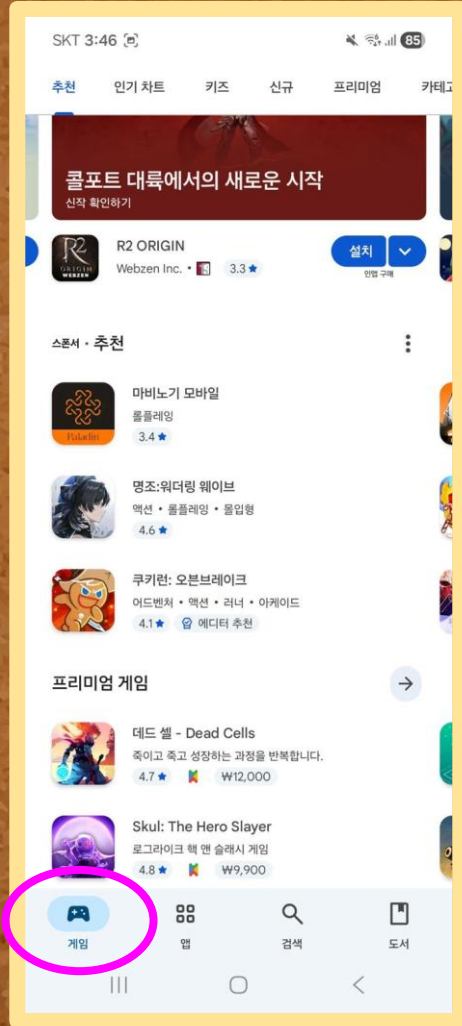

Contents

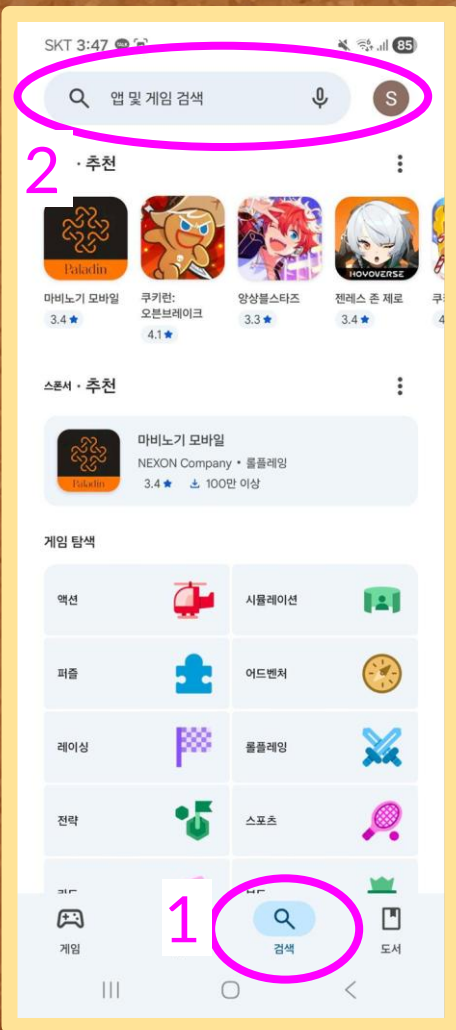

- Finding google play/app store?
 - How to use the search bar?
 - How to type with voice recognition?
 - How to delete existing apps?
 - How to move the apps to homepage?
- 

This is the homepage of Google play store

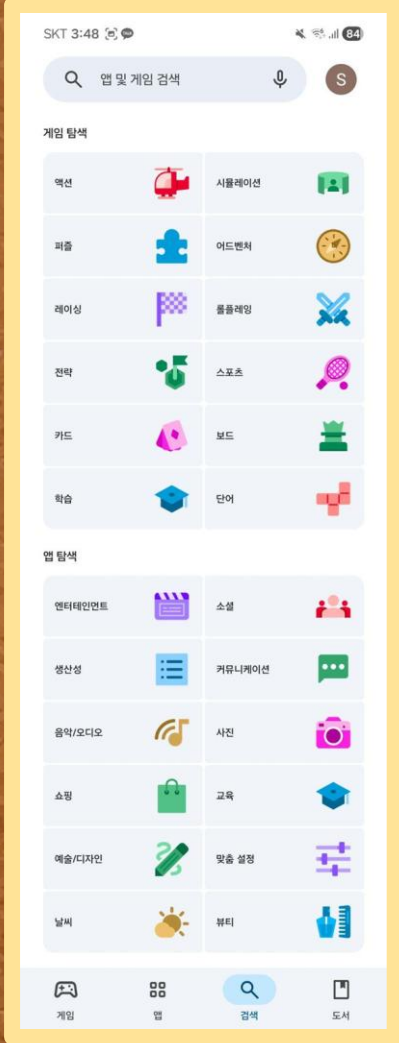

Here you can find recommended or trending apps

There is the search page

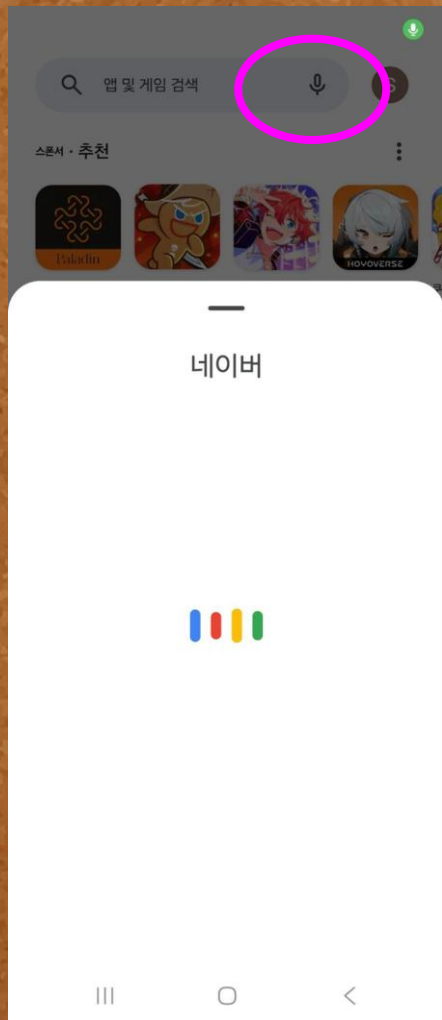

You can type or dictate the app you want to find in the search bar

After typing the name, click enter on your keyboard to search

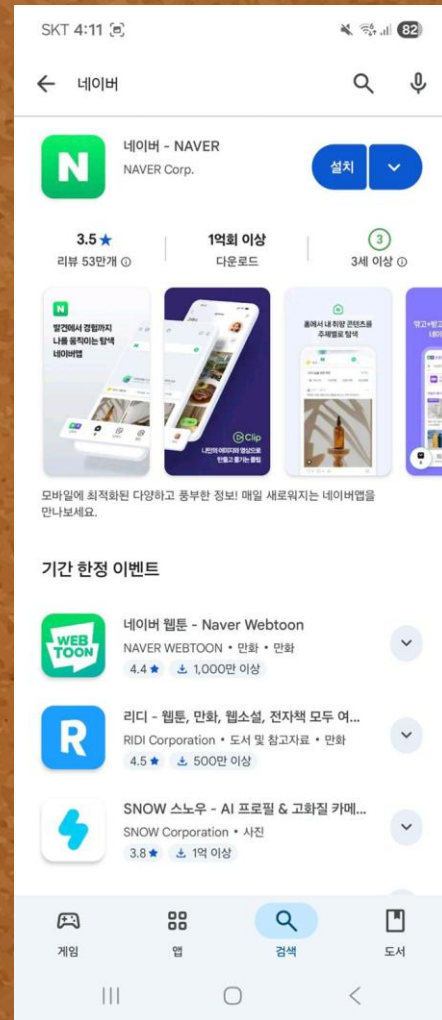

Here there are apps sorted into different categories

You can find apps that you need

You can also use the
voice recognition to find
apps

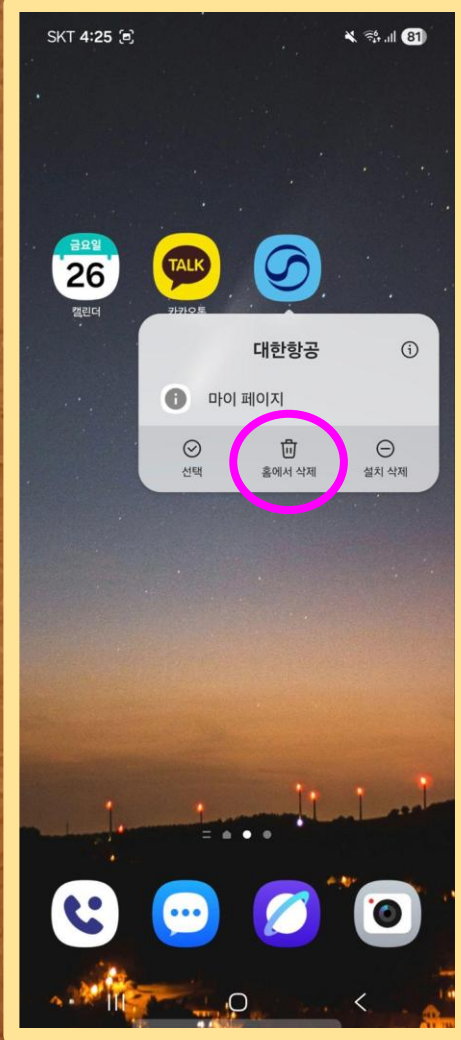

Press download when
you find the app you
want

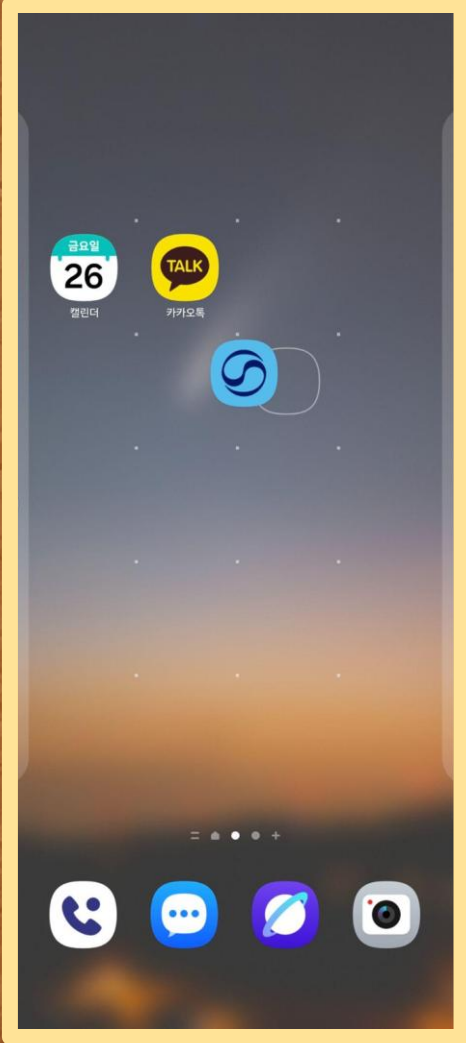

How to move and delete apps

Press and hold on to the icon of an app
until this screen appears

Press the trash can button to delete the
app

To move an app, press and hold the icon, then drag it along the screen to the place you want it to be

To make a folder, drag the app onto another app

**Thank
you!**
